PUBLICATIONS 83/84

FOREWORD

PUBLICATIONS is a bilingual bibliographic listing of scientific, technical, and interpretive publications published by the Research Centres, Institutes, and Headquarters of the Canadian Forestry Service (CFS) during each calendar year. This listing includes the author, title, price (if any), and source of distribution of each publication.

Titles of publications available in both official languages are listed in both languages. Other publications are published in one official language only or in one official language with an abstract in the second language. The language of the title of such publications is the language in which these publications are available.

Requests for copies of listed publications should be directed to the applicable CFS establishment at the address shown on the last page of this issue of *PUBLICATIONS*.

AVANT-PROPOS

PUBLICATIONS constitue un répertoire bilingue bibliographique des publications scientifiques, techniques et de vulgarisation publiées par les centres de recherches, les instituts et l'administration centrale du Service canadien des forêts (SCF). La présente liste renferme l'auteur, le titre, le prix (s'il y a lieu) et la source de distribution de chaque publication.

Les publications, qu'on peut se procurer en français et en anglais, ont un titre dans les deux langues. Les autres publications sont disponibles dans l'une des langues officielles avec résumé dans l'autre, ou dans l'une des langues officielles seulement. La langue du titre est celle dans laquelle ces publications ont été imprimées.

Les demandes de publications devront être envoyées aux adresses des établissements du SCF indiquées sur la dernière page de ce numéro de *PUBLICATIONS*.

THE CANADIAN FORESTRY SERVICE
GOVERNMENT OF CANADA

The Canadian Forestry Service is the principal source of federal expertise in forestry. Its general objective is to promote the wise management and use of Canada's forest resources for the economic, social, and environmental beneefit of Canadians.

The following are the main functions of the CFS:

1. Coordination of federal policies, for the promotion of better resource management and forest industry development.
2. Provision of scientific and technological leadership in forestry through research and development.
3. Provision and analysis of national and international statistics and information as a basis for policy formulation.
4. Development and certification of codes and standards for wood product performance.
5. Protection of Canada's forests from foreign pests.
6. Fostering the potential use of the forest resource for energy.
7. Contributing to the environmental objectives of the government of Canada.

A number of federal agencies are involved in forestry programs and a Federal Forestry Sector Strategy Committee has been established to coordinate federal forestry activities. The Canadian Forestry Service has been designated the lead agency role.

The Canadian Forestry Service is comprised of a Headquarters Unit, six Forest Research Centres and two National Institutes. The Forest Research Centres are responsive to regional priorities and maintain close liaison with the respective provincial government forestry departments and other clients. They also participate in, and frequently lead, national programs. The National Institutes provide the focus for programs of national scope.

SERVICE CANADIEN DES FORÊTS
GOUVERNEMENT DU CANADA

Le Service canadien des forêts (SCF) réunit la majorité des spécialistes fédéraux en foresterie. Son objectif général est de promouvoir l'aménagement et l'utilisation judicieux des ressources forestières du Canada pour le plus grand bien économique, social et environnemental des Canadiens.

Voici les principales fonctions du SCF:

1. Coordonner les politiques fédérales afin de favoriser l'amélioration de la gestion des ressources et l'expansion de l'industrie forestière.
2. Fournir une orientation scientifique et technologique dans le domaine de la foresterie, par la recherche et le développement.
3. Fournir et analyser les statistiques et l'information nationales et internationales qui serviront à établir les politiques.
4. Mettre au point et homologuer des codes et des normes en matière de rendement des produits du bois.
5. Protéger les forêts canadiennes en luttant contre les ravageurs étrangers.
6. Parrainer l'utilisation éventuelle des ressources forestières pour la production d'énergie.
7. Adhérer aux objectifs environnementaux du Service canadien des forêts.

Divers organismes fédéraux participent aux programmes forestiers, et un comité de la stratégie forestière fédérale a été créé pour coordonner les activités fédérales en matière de foresterie. Le SCF a été désigné organisme directeur.

Le Service canadien des forêts comprend une administration centrale, six centres de recherches forestières et deux instituts nationaux. Les centres de recherches forestières doivent répondre aux impératifs régionaux et entretenir une liaison étroite avec les ministères provinciaux des Forêts. Ils participent également à des programmes nationaux dont ils assument fréquemment la direction. Les instituts nationaux sont les foyers des programmes d'envergure nationale.
